

Project Excellence - Marking Schedule.

This award celebrates outstanding achievement in project delivery. It recognises innovation in engineering, excellence in project management, and the successful execution of complex initiatives. Nominees demonstrate creative problem-solving, technical ingenuity, and a commitment to delivering high-quality outcomes on time and within scope.

Category	Description	Max Points
Project Delivery and Execution	Timely completion, adherence to scope and budget, and delivery of intended outcomes. Demonstrates strong execution under defined constraints.	20
Innovation and Technical Ingenuity	Creative solutions to complex challenges, use of new or emerging technologies, or original approaches that advance industry practice.	20
Project Management Excellence	Strong planning, risk management, stakeholder communication, resource coordination, and ability to adapt to changing conditions.	20
Impact and Value	Clear benefits or value created for clients, communities, or the industry. Can include economic, environmental, or social impact.	20
Team Collaboration and Leadership	Evidence of cohesive teamwork, inclusive practices, effective leadership, and the ability to inspire high performance across disciplines.	10
Quality and Standards	Adherence to high standards of quality, safety, and compliance throughout the project lifecycle.	10

Scoring Guide

- **Excellent (90–100%)** – Far exceeds expectations, widely recognized for contributions.
- **Good (70–89%)** – Consistently strong performance with some standout achievements.
- **Satisfactory (50–69%)** – Solid contribution, meets expectations.

Project Excellence - Example Winning Nomination.

We wish to nominate '*Nominee*' for the Project Excellence Award, based on his outstanding involvement in '*Project Name*'.

Nominee's pivotal role in implementing LoRaWAN technology & IoT sensors as part of this rural connectivity project demonstrates his exceptional technical prowess and innovative thinking. The project task was to provide a scalable, low power consumption, cost effective solution to remotely monitor and control various things on a 1200Ha farm with 10,000 stock unit sheep and beef in operation.

The overarching goal was to consolidate all measurement and monitoring needs onto a single, unified platform. Recognising the challenge many farmers face with managing multiple apps and subscription services, the solution *Nominee* offered helped to streamline operations while minimising complexity and ongoing costs.

Nominee's dedication to exceeding customer expectations was evident throughout this project. Over this six month venture he provided regular support and advice, navigating solutions to ease any barriers they encountered. He recommended robust and reliable products, including Milesight Gateways, IoT sensors and controllers, complete with connecting the [Brand] tracking platform to measure and monitor analytics visually and remotely. His attention to detail and unwavering focus on customer satisfaction set him apart as an exceptional leader in project management.

The results for the customer speak for themselves. What used to take the farm owner hours of driving and manual checking, now takes minutes on a phone. With 20 water tanks, 3 solar systems, grain silos, irrigation, and on-farm safety - now all remotely monitored.

The case study we attach is testament to the invaluable contributions and the positive impact his involvement has had on the success for the [Farm Name] community. An excellent example of connecting through collaboration.

In conclusion, we believe *Nominee*'s outstanding contributions make him an ideal candidate for the Project Excellence Award.

This nomination included 2x references as evidence of the above.
